WALLY NTHANI

JUNIOR FULL-STACK SOFTWARE DEVELOPER

Mbombela, Mpumalanga, South Africa | wallynthani@gmail.com
Portfolio | GitHub | LinkedIn

Professional Profile

Aspiring junior full-stack software developer building practical web applications through independent, project-based learning. Hands-on experience developing WorkBridge, a skills-first career-readiness platform, using Next.js, React, TypeScript, Tailwind CSS, Supabase and PostgreSQL. Brings additional workplace experience in computer-lab support and artisan-assistant operations, with an interest in building useful, reliable software and continuing to grow in full-stack development and cybersecurity.

Technical Skills

Frontend	React, Next.js, TypeScript, JavaScript, Tailwind CSS, responsive UI
Backend & Data	Node.js, Supabase, PostgreSQL, authentication and database integration
Tools & Workflow	Git, GitHub, npm, VS Code, PowerShell, deployment with Vercel
IT Foundations	Technical support fundamentals, computer systems and networking fundamentals

Featured Project

WorkBridge | Skills-First Career Readiness Platform

Live project: workbridge-navy.vercel.app | 2026

- Contributed to the product concept and application architecture for a platform that helps young people explore career paths, build skills and document evidence of learning.
- Worked on a responsive interface and core areas including career assessment, skills roadmaps, learning progress and an evidence-based portfolio.
- Implemented authentication and database integration using Supabase and PostgreSQL, and worked on deployment.
- Technology stack: Next.js, React, TypeScript, Tailwind CSS, Supabase and PostgreSQL.

Professional Experience

Educational Assistant – Computer Lab — 2023

Maphakama Primary School

Supported computer-lab learning activities and assisted learners with access to computers and digital learning.

Artisan Assistant — 2019

Sappi shutdown project

Supported artisans and site teams during shutdown operations, carrying out assigned assistance duties in an operational work environment.

Education & Professional Development

National Senior Certificate (Matric) — 2015

Google IT Support Professional Certificate – Coursera
Completed coursework: Technical Support Fundamentals; The Bits and Bytes of Computer Networking. Continuing with the programme.

Portfolio and project links above provide examples of practical, self-directed development work.
